

ASDAN Science

Pupils complete the ASDAN Science Short Course from year 9 onwards. The course involves collecting evidence for practical based challenges. The can earn up to six credits for the six modules studied:

- Human machine
- Forces and motion
- Chemical change
- Biological challenges
- Space physics
- Performance in sport

The ASDAN course is designed to prepare the pupils for KS4 studies, developing skills such as; data collection, displaying results, forming hypotheses and conclusions, and evaluating the scientific method, all whilst learning new scientific theories. Pupils are encouraged to reflect upon their work and will also write a personal statement and summary of achievements once the course is completed.
