

Who Are We?

We are of course a specialist school, but we will consider admissions for children from all four broad areas of need, whatever their current ability or starting point or previous experience in their current school. We have three pathways available to children with EHCP's in KS2, 3 and 4 (age 9 to 16). We will sometimes take children without an EHCP if their Local Authority has agreed to conduct an assessment. At the Vyner site, we have 18 classrooms, including 11 specialist 'Nurture Bases', Science Lab, Art room, Food technology suite and an Engineering workshop. Most children attend school full time, but we can offer bespoke teaching programmes and very specialist individualised programmes of education, depending on your child's individual needs and aspirations. We do not only cater for children from the Wirral, a small number of our pupils come from all over the United Kingdom. As an indication of the quality of our new provision, the school is heavily oversubscribed and there is a waiting list for admission into every year group. If we can though, we always will try and work with you and your child's Local Authority to get the very best education offer for your child, and can support you while you are waiting for a place to become available. [TOS Local Offer.](#)

Our work has supported schools internationally, with our staff and pupils working and supporting schools in Finland, Spain, France, Italy and Turkey. Professionals from those countries have also spent time learning about our pedagogical approaches, adapting them for their schools. [Go to international page here.](#)
